The flow data is in the Monitoring Data with location CC06. Data goes through 10/15/2015, after that the water went into the pipe. We can get an estimate of recent flow from Alexco, the water treatment plant folks, if needed but it would just be an estimate because the water flows through the Gladstone ponds before going into their plant.

I have the data in an Excel spreadsheet if that's easier. The average flow from 8/11 to 10/15 was 571 gpm. Let me know if I can help further.

Jan

Hi Jan,

I hope you are well. Do you know where one can find the flow data from the Gold King adit? Is it in a particular Scribe project?

Thanks, M
